Marilyn Strowmatt

Owner, KK's Quilt and Design Studio

Although not her original career path, Marilyn has always been interested in computer technology. Combining that love with her passion for quilting led to an exciting second career as an Independent Software Instructor. She has been a computerized machine embroidery instructor since 2001. Purchasing her first longarm in 2011 expanded her instructional offerings to fellow quilters. In 2017, she became an Art and Stitch Certified Teacher.

In 2021, she wrote and self-published her first three instructional Guides on Pro-Stitcher Premium and Pro-Stitcher Designer. The Guides are part of her on-line instructional training both Live and On-Demand through her website.

She has also expanded her teaching online, offering several computer programs all related to the sewing and quilting interests. Every day since then, she looks for exciting and innovative ways to use the program in her own quilting, her customers quilts and to inspire and teach other quilters.
